

## Process for changing Dealer of Record

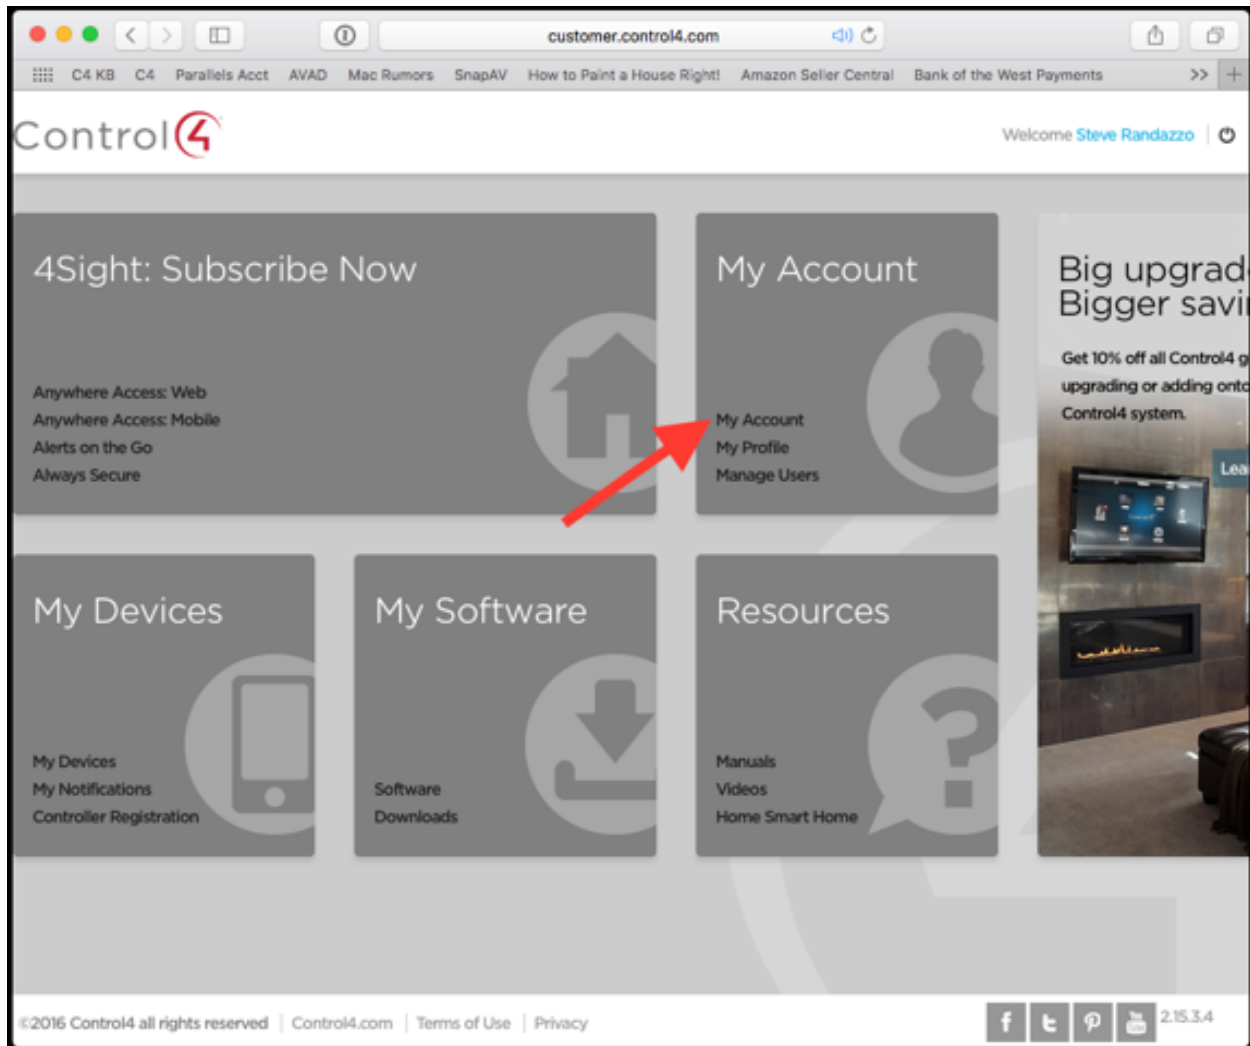

Here's a little instructions and a few screen shots that should get you through changing dealer of record.

First go to <https://customer.control4.com>

Enter email and password. If you don't know password just enter email and press the "Forgot Password" link. The system will then send you a new password and link back to website.

Once you are logged in select the My Account in the My Account box.

Once you've done that you'll see your account information. Press the Edit button on the upper right and then you'll be able to edit any information on this screen. Most importantly, at the bottom change the Dealer to Randazzo's Home Systems (first one in the list).

That should do it. If you have any questions please let me know.
